

Instructions on how to insert SIM card in
the CALMS device

For CAL-EDGE-8

Tools needed to install the SIM card

- Crosshead screwdriver
- Small slotted screwdriver

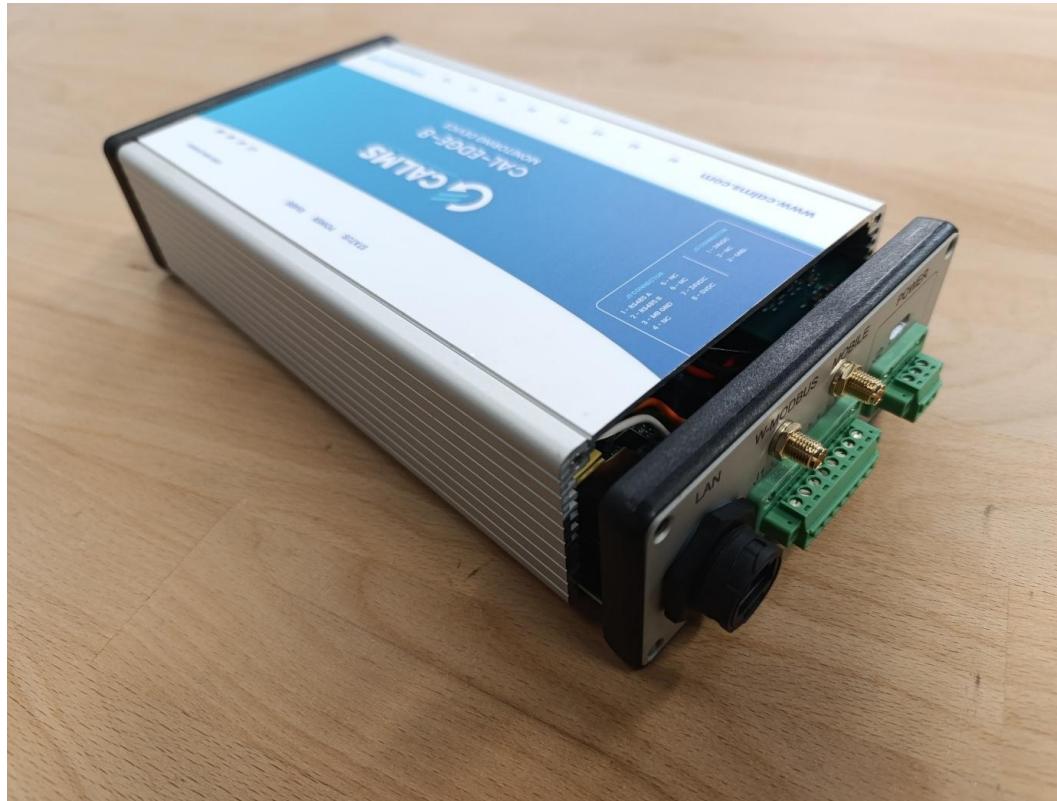

1. Remove USB plug

2. Remove the 4 screws on both sides of the device

3. Carefully remove the front cover

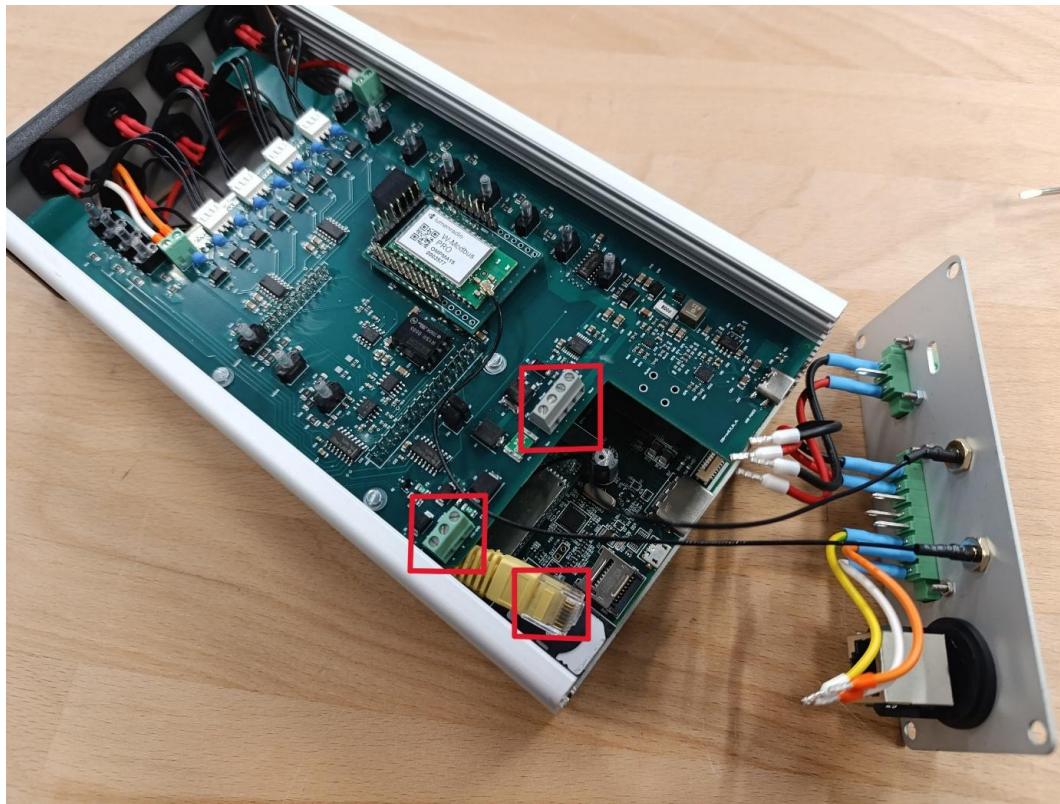

Do not pull too far, as
the plate is
connected to the
circuit.

4. Carefully remove the top plate by sliding it forward

Push the front plate slightly downwards so that it does not get in the way.

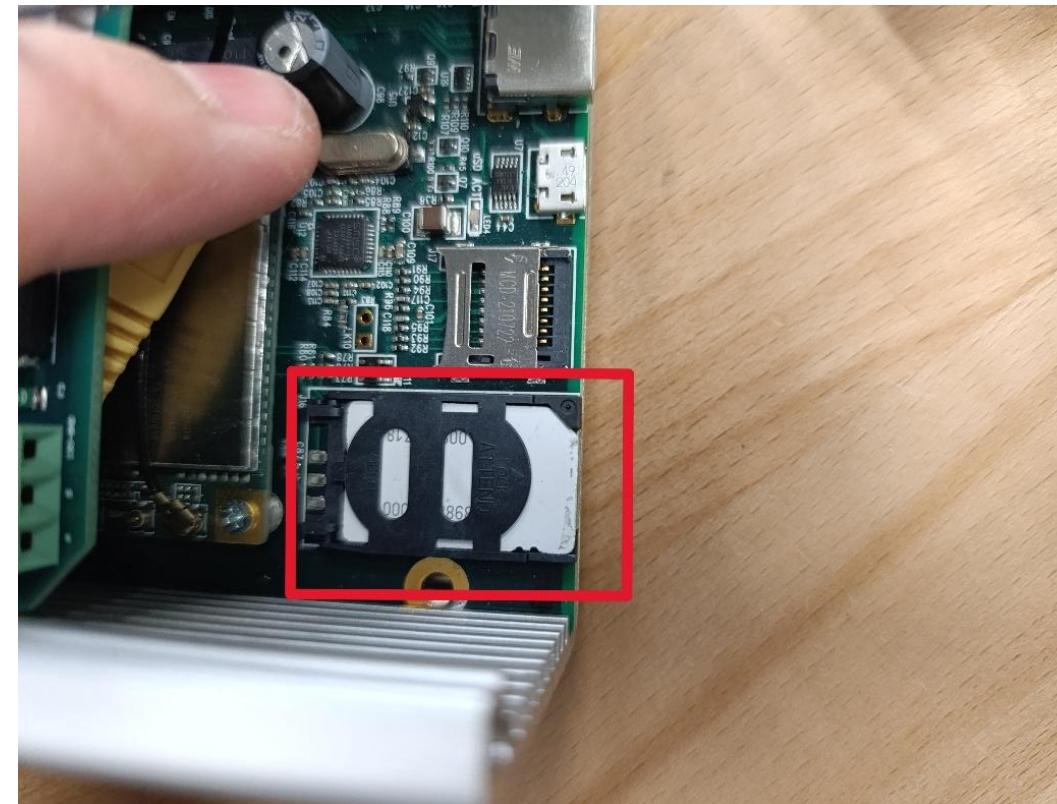

5. Disconnect the cables from the PCB to access the components underneath

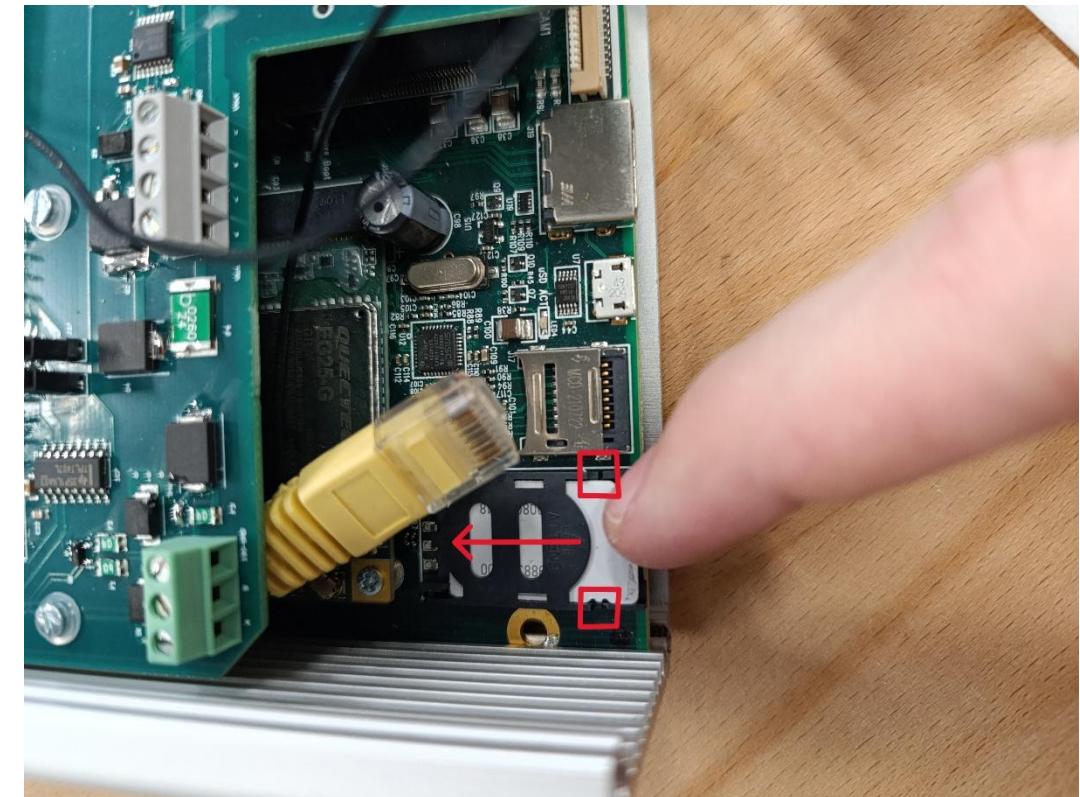

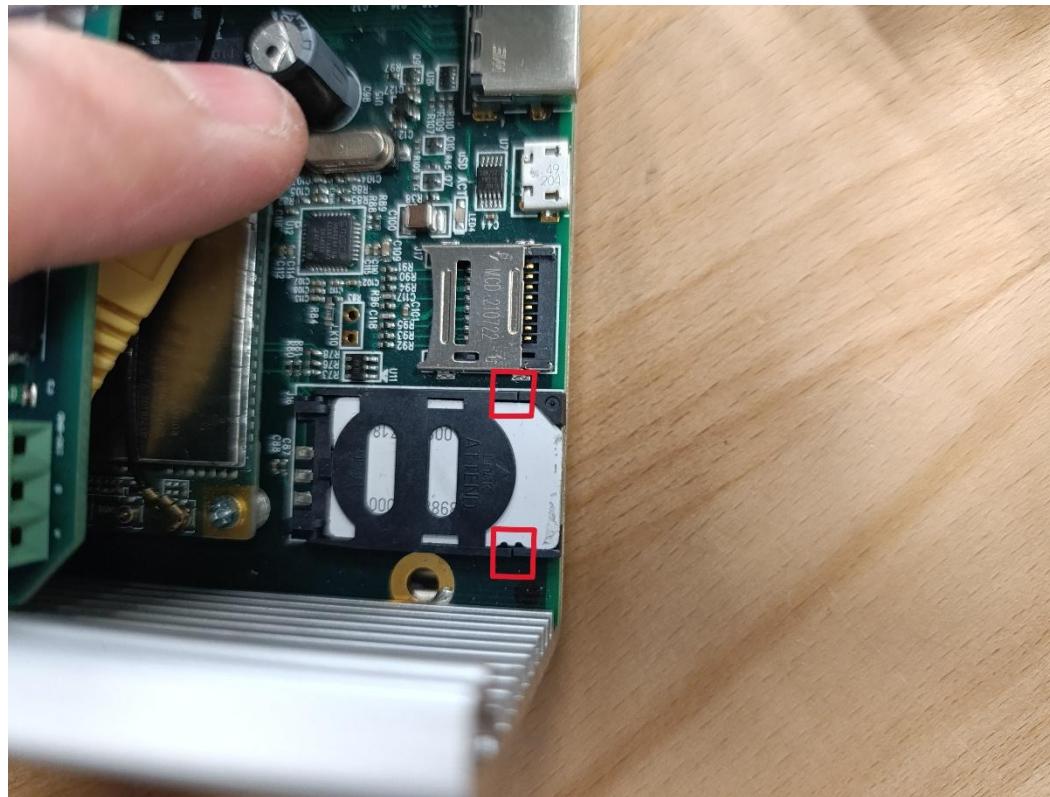

Unplug the cables from the two connectors and disconnect the UTP cable.

Antenna cables can be left connected as they are long enough not to get in the way.

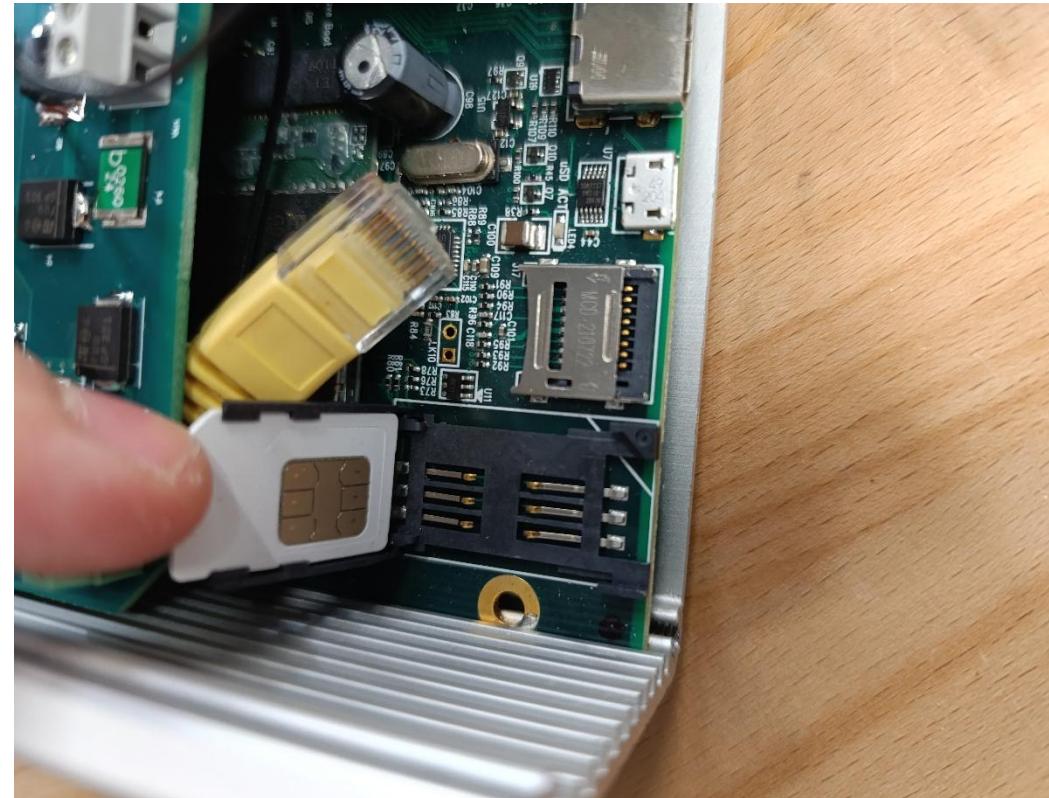

6. This is where we insert or replace the SIM card

7. The location where the SIM card is located must be moved to the left to "unlock" it

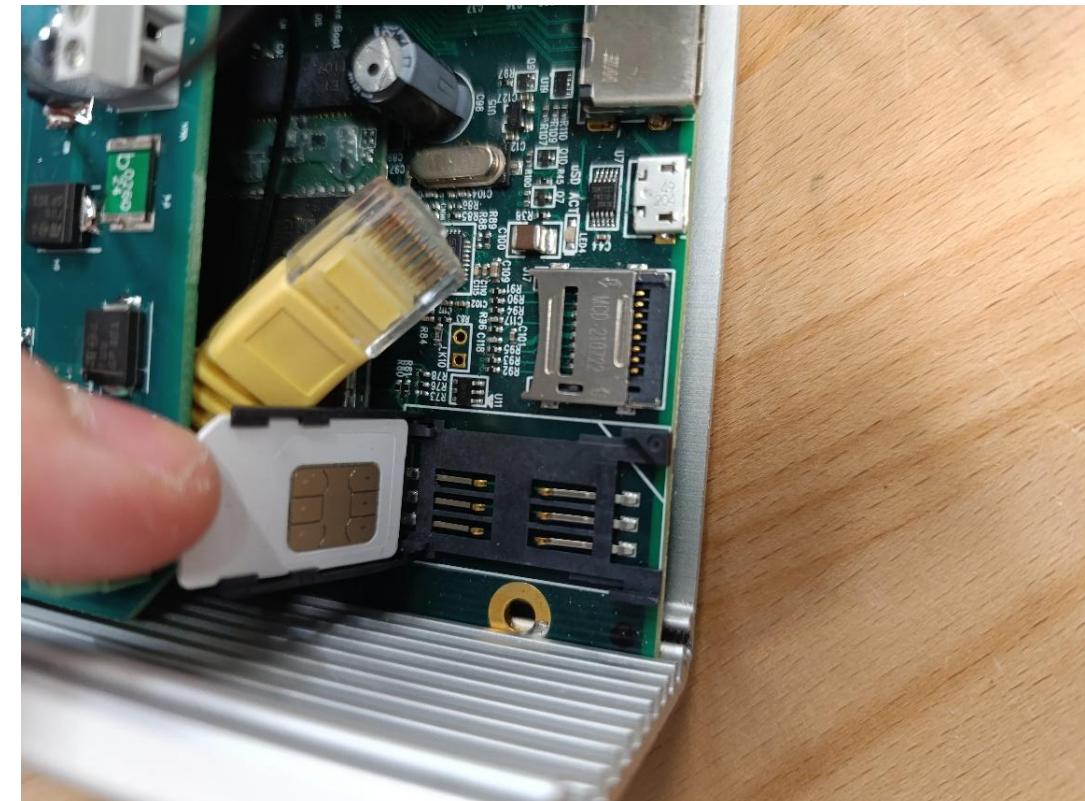

8. If you did it correctly, you can now lift the black lid

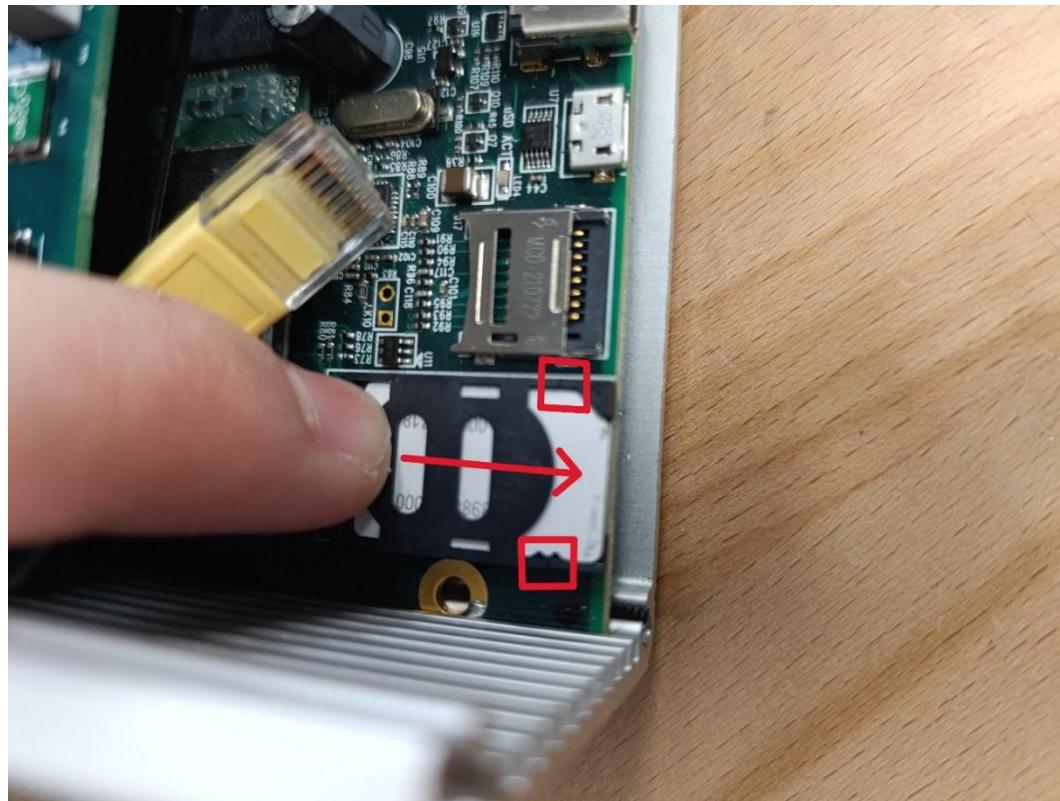

9. Insert or replace SIM card

There is a thin slot on the black lid into which the SIM card is inserted.

Make sure it is facing the right way, as shown in the picture.

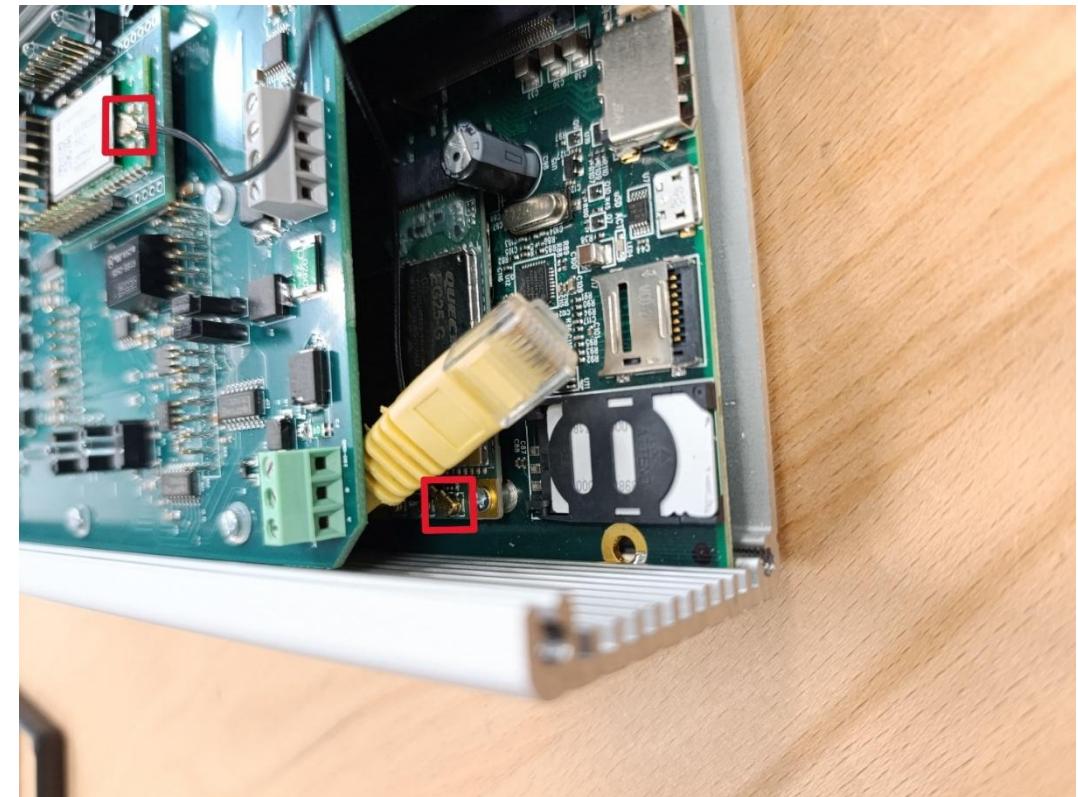

10. Close the black cover with the SIM card

Make sure that the SIM card cover is secured. If everything is as it should be, you will no longer be able to lift the cover.

11. Check that the antenna cables have not accidentally been loosened

You can gently press on the connectors to make sure they are securely connected.

12. Reconnect the cables

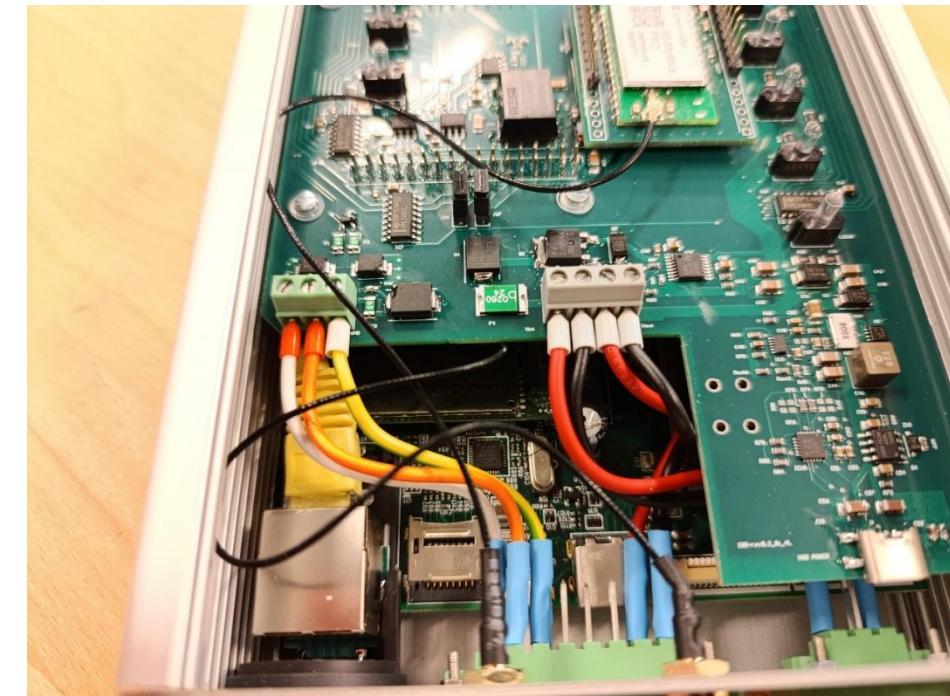

Cables from the J1 connector (front panel)

Pin	Terminal Block	Terminal Pin
1	Green	1
2	Green	2
3	Green	3
7	Gray	3
8	Gray	4

Cables from the J1 connector (front panel)

Pin	Terminal Block	Terminal Pin
1	Gray	1
3	Gray	2

Don't forget to connect the UTP cable

13. Once this is done, you can put the device back together

Slide the top plate back into place and screw both side plates back on.

Be careful not to pinch the cables with the top plate.

Insert the plug back into the USB port.

Disclaimer: CALMS cannot provide any additional support regarding device connectivity if custom SIM card is used.

In case the customer wants to use custom SIM card in the CAL-EDGE-8, changes in device settings need to be made.
